### To deoxidize old and collectible weapons.

Removes in a few moments the oxidation traces, the corrosion flower or the rough picket. This treatment is suitable for corroded weapons and stops the progress of the sting.

#### MANUAL :

Disassemble the parts to be treated. Spread the fine deoxidizer with a brush in several successive applications, rub with steel wool until the oxidation spots have disappeared, rinse with water while brushing and dry with a hair dryer if necessary.

#### PRECAUTIONS AND RECOMMENDATIONS:

It is essential to stabilize with the neutralizer before starting any other treatment on the metal. Pass the neutralizer several times because some steels can become porous. Bring gloves.
