The Mach 1 pellet rifle finally in 29 joules and IGT

This rifle with a silencer is based on an oversized cylinder 33mm in diameter, ensuring extraordinary consistency and durability.

This cylinder associated with IGT technology constitutes Mach 1 technology.

This rifle is delivered with a 4x32 WR scope.

The IGT SYSTEM in a few words:

IGT: Insert Gaz Technology - Gamo's technological revolution in the world of air rifles! The spring is replaced by an inert gas tube, which allows a constant effort during rearming, greater regularity, less vibration and therefore more precision!

- More speed and penetration (up to 380 m / s)
- Less vibration thanks to the inert gas cylinder
- Better precision and less pneumatic friction
- Less wear and tear on friction, longer life
- Adapted armament, very soft (less friction between metals)
- Constant and lasting power (the cylinder always delivers exactly the same power)
- New synthetic stock with non-slip granular surfaces.
- IGT piston system
- Truglo fiber optic sights.
- New SWA anti-kickback plate for better absorption of kickback.
- 29 joules
- Equipped with the Maxxim barrel with integrated sound reducer
