MN320	Norma 35 Whelen - Oryx	C	.35 Whelen	Oryx	4436	740	20	250	101.00 € incl. tax

Norma Cal .35 Whelen, a powerful caliber for big game hunting.

The design of Norma balls is one of the most renowned in the world. Norma offers a fantastic range in which each cartridge is synonymous with reliability, accuracy and efficiency.

The .35 Whelen caliber is particularly suitable for hunting wild boar and large deer.

Norma Oryx

The Oryx is a deformation bullet with high mass conservation thanks to the core welded in lead to the jacket

- Slim anterior sheath for rapid expansion
- Harder posterior sheath
- Significant mass retention

The .35 Whelen is a necked up medium bore wildcat cartridge that was created by necking up a .30-06 Springfield case which is famously overpowered for the 30-caliber bullet it propels. The .35 Whelen fires a larger .358 bullet and is therefore right at the cusp of being a big game caliber and is capable of handling everything except thick-skinned dangerous game reliably.

Oryx means good accuracy, massive mushrooming and high residual weight. This bonded design suits the all-round hunter who wishes to simplify the choice of cartridge for hunting. Oryx is available in most calibres from 222 Remington to 375 H&H Magnum. Thanks to its excellent performance, in a very few years Oryx has become the most popular of the Norma bullets.
