SI27100	STALON RC 1 / 2-20 UNF	Vente libre	1/2 x 20 UNF	12	30	78	93.00 € incl. tax

A sound moderator for rimfire rifles

Sound reducer specially developed for .17 MR, .22 Lr and .22 Mag ammunition

- 30mm diameter
- Sound reduction of -21.8 db (.22Lr)
- Machined from high quality black anodized aircraft aluminum
- Mount on barrel thread
- Disassembly to facilitate maintenance of the sound reducer

A high quality and durable silencer.

Swedish engineers have found a clever mix between the ergonomics of the silencer and its sound attenuation performance.

With its diameter of only 30 mm and length of 120 mm, all coupled with a weight of 78 g, make it a compact and light sound moderator that will not unduly unbalance the rimfire type 17 HMR or 22 rifle. Long Rifle.

The STALON RC is offered at the best price allowing you to equip your shooting or leisure rifle with a cheap but formidably discreet silencer.

The machining quality of the STALON suppressor makes it possible to maintain perfect shooting precision.

In order to measure the sound attenuation power of their silencer, STALON relied on a protocol of strict military origin, the MIL-STD-1474D. This protocol is used in military equipment and makes it possible to measure in a precise and non-erroneous way, the capacity of a sound moderator for assault rifles and weapons of war.
