The big brother of the X108 adapted to magnum calibers, with even more impressive acoustic performance!

A sound suppressor with a slim and elegant design intended for hunting.

- Excellent sound reduction of 32.5 dB (in .308 caliber)
- diameter of 49 mm, length of 276 mm and weight of 394 g.

max cal. .223 = .22-250, .22 hornet, .222, .223

max cal. 6.5mm=6mm, .243, 6.5CD, 6.5x55

Cal. Max 308 = 270 Win, 7x57, 7x64, 7mm RM, 7.62x51, 308 Win, 300 WM, 30-06 Spr

A sound moderator specially developed for hunting.

- Made of high quality black anodized aeronautical aluminum
- Stainless steel baffles
- Telescopic system with barrel cover
- Interchangeable front part of the silencer according to the caliber of the rifle.
- Significant recoil reduction with its rear gas decompression chamber
- Important durability

An elegant sound reducer with incredible finishes

Its telescopic operation with covering of the barrel, allows a distribution of the masses providing rigidity and prevents any deformation of the barrel which can bend under the weight of the sound moderator.

This allows you to maintain incredible precision, while practicing discreet shooting.

The strong point of STALON silencers is the right balance between acoustic performance, weight, ease of assembly and size.

Equip yourself with the best silencer for hunting, especially for stalking or lying hunters.

The STALON X149 is distinguished by its greater acoustic attenuation.

Just like the X108, its front part is interchangeable, allowing to have only one silencer for all its hunting rifles with several front parts adapted to each caliber.

In order to measure the sound attenuation capacity of their silencers, STALON used a strict military protocol, MIL-STD-1474D. This protocol is used in military equipment and makes it possible to accurately and non-erroneously measure the capacity of a sound moderator for assault rifles and weapons of war.

Find the detailed protocol in detail by [clicking here](#).
