- Multi-coated HD lens with a light transmission rate of 99.5%
- Supplied with Flip-Up protective windscreen

A riflescope at an affordable price without compromising on quality and precision. It will be ideal on a 22 lr rifle. for long distance shooting, or on a larger caliber semi-automatic rifle, such as the AR15, AR10, M14, FAL.

Recognized by shooters in the USA for their high accuracy, RITON optics deliver incredible image resolution even at the highest magnification. Its lens quality allows high light transmission, for precise shots even in low light.

Its zeroable graduated turrets allow ultra-firing corrections that are both visual and tactile, with a quick return to the original settings.

RITON glasses were developed by shooters, former soldiers, and former members of US law enforcement. This generates a great requirement as well as an important control in the manufacture with selected materials of high quality.
