SKU	Designation	French Law	Thread	Length (cm)	Diam. (mm)	Weight (g)	MSRP
SAI120	SAI COBRA IMPULS SILENCER	Vente libre	M13.5/1	19	33	265	560.00 € incl. tax

The IMPULS unit facilitates the cycling of the GLOCK and adapts to all types of ammunition

- Thread M13.5x1L
- For cal. 7.65 - 9mm
- Muffler body machined from aircraft alloy
- Equipped with an adjustable IMPULS compartment, in order to adapt to each GLOCK and each type of ammunition used, allowing good cycling of the weapon.
- 10,000 round capacity
- Sound reduction of approximately 20 dB
- Supplied with specific bushing for Glock barrel

The COBRA Impuls+ was developed by SAI in order to adapt perfectly with weapons whose barrel activates the recoil of the slide, such as the GLOCK.

It allows a perfect cycling of the weapon in order to avoid any shooting incident.

The IMPULS unit is equipped with an internal spring whose tension is adjustable in order to adapt to any size of barrel and any type of ammunition used.

The COBRA RB Silencer with part of its polymer baffles further reduces the sound impact regardless of whether the ammunition is subsonic or supersonic.

Polymer baffles produce maximum performance for 50-80 strokes. At the end, the silencer remains usable, but its acoustic performance will be similar to a "standard" moderator fitted with aluminum baffles.

Small arms industries is a company based in Denmark, with a long and strong experience in silencers for military purposes.

Their products equip many police units and armed forces around the world.
