Arabuko GTX is a shoe that is ideal for steep terrain, it is made of oily Nubuck and the toe and heel are covered with an elastomer coated crust.

The quick closure offered by the BOA system constantly ensures an optimal fit. Waterproofing and breathability are guaranteed by the GORE-TEX Sierra membrane, making the shoe suitable for winter climates. Optimal management of the internal microclimate, breathability and hygiene is ensured by the bold Nubuck upper and the Otholite 2D insole.

The Beretta line of boots stands out for its technicality and design, developed to ensure optimal comfort and protection on various terrains. It offers a variety of Vibram® sole models that incorporate different combinations of materials and technologies, guaranteeing total grip and stability. These soles feature self-cleaning side grooves, as well as toe and heel fins for better grip on rocky surfaces. The anti-shock polyurethane sole reduces stress on the joints, ensuring a perfectly comfortable and stable fit. Even in extreme conditions, the Gore-Tex membrane provides reliable waterproofing and thermal insulation.

To maximize the resistance of the shoe, Cordura® inserts are integrated. The Vibram® Bristol sole, with an integral protective strip, guarantees a high level of central cushioning, while the configuration of the bottom provides excellent traction.

- Breathable
- Real leather
- Raincoat

- 52% Nylon, 48% leather
- UPPER: Oily Nubuck Dakar leather, Cordura Puma, PU coated crust, Superfabric Surf
- CLOSURE: BOA TONGUE BRIDGE
