Invisible fence with battery backup 16 hours!

The battery integrated in the control box provides 16 hours of operation in the event of a power cut.
Signal generator:

- Dimensions: 156 x 116 x 35mm.
- Warning zone width: adjustable over an area of 0 to 10 m.
- Width of the correction zone: adjustable over an area of 0 to 10 m.
- Wire Type: Low Resistance, Copper Insulated
- Wire length: 100 meter spool supplied, additions up to 1200 meters maximum.
- Wire diameter: from 0.75 to 2.5 mm², the section must be adapted to the length of the fence:
- Up to 400 m: 0.75 mm²
- 400m to 600m: 1 mm²
- 600m to 900m: 1.5mm²
- 900m to 2200m: 2.5mm²
- Power supplied: 230 V/ 50 Hz, 15 V/ 300 mA adapter.
- Backup battery: 9.6 v (16 hours of autonomy).
- Working temperature: -10 to 50 degrees.
- Area covered: maximum 30 ha.

Necklace :

- Dimensions: 34 x 43 x 64mm.
- Adjustable neck circumference: 15 to 72 cm.
- Power supplied: CR2 3v lithium battery.
- Battery life: 6 months in standby mode.
- Waterproof.
- Correction stimulations: 8 levels of intensity.

The DogTrace d-fence invisible electronic fence allows one or more dogs to run freely in a demarcated space, fenced or not. The wire can be placed on the ground, slightly buried (maximum 10 cm deep) or attached to an existing fence. In standby mode, the system waits for your dog to approach the prohibited zone (formed by an insulated wire functioning as an antenna).

This zone is made up of a first part which serves as a warning, then a correction zone. If your dog crosses the first boundary and enters the warning zone, he will receive an audible signal. If he continues and enters the correction zone, the collar will emit corrections by electrical stimulation. As soon as the dog leaves the prohibited area, the system returns to standby mode. The widths of the warning and correction zones are easily adjustable from the generator to suit your terrain and your dog. With quick initial training, your dog will quickly learn to respect the limits imposed by the invisible fence. The system can work with an unlimited number of dogs by adding additional collars to the original pack.

This pack is composed of:

- A generator.
- A **spool of insulated wire 100 m long** and 1 mm in diameter.
- 1 x adapter, generator mounting screws.
- 1 battery for the receiver.
- 2 sets of electrodes 12 and 17 mm.
- User Manual.
- Receiver collar.
- Wire connection plug on the generator.
- Connectors for connecting the antenna wires.

Supplied with a guarantee certificate! The product is guaranteed for two years from the date of purchase!
