**Cartouche spéciale zones humides à grenaille cuivre et bourre acp**

Special cartridge for wet areas with copper shot and ACP filler in Greenwad® biodegradable material.

**It can be fired in all proven “fleur de lys” steel ball rifles.**

The ACP Greenwad® cartridge is equipped with Vouzelaud's patented ACP wad, injected into the Greenwad® biodegradable material, it will naturally disappear in nature. This major innovation limits the impact of fluff on the environment and performance is at the rendezvous.

The # 20 and # 20 caliber cartridges must be reserved for tested rifles "Fleur de Lys steel balls". The others can be shot in any rifle.

- Calibres 20 in 20 g with brass 16 mm base
- Star closure
- Sold in boxes of 10 cartridges

With a density of 8.92, copper is a more dense metal than steel: it allows a range gain of about 5 meters. However, its hardness, certainly less important than steel, does not allow to classify it as the lead cartridges. So there are also copper cartridges only for guns tested steel balls.
