### Special cartridge wet areas with steel shot and ACP wad

Vouzelaud patented ACP bourre injected in the greenwad® biodegradable material. Loading at 410 m / s.

The ACP greenwad cartridge is equipped with Vouzelaud's patented ACP wad, injected into the greenwad® biodegradable material, it will naturally disappear in nature. This major innovation limits the impact of fluff on the environment and performance is at the rendezvous.

The 70 ACP 'performance steel' has the same general characteristics as the '70 ACP steel'. Its loading at 410 m / s with the ACP padding 2 gives it a good efficiency and the high performance standard makes it possible to use larger grains than the ordinary norm does not allow. It is intended for tested steel shotguns 'Fleur de lys'.

Power is optimized at greater distances thanks to the ACP generation 2 wadding.

- Star closure
- Calibres 12 in 28 g with 16 mm nickel-plated base
- Sold in boxes of 10 cartridges
