GPA

| SKU | Designation | French Law | Caliber | Bullet type | Energy (J) | Speed (m/s) | Pack. | Grains | MSRP |
|--------|-----------------------|------------|----------|-------------|------------|-------------|-------|--------|--------------------|
| BG2714 | Cal. 270 WSM type GPA | C | .270 WSM | GPA | 3123 | 930 | 20 | 143 | 117.00 € incl. tax |

French monoblock bullet ammunition (GPA) specially designed for the toughest caliber .270 Winchester Short Magnum.

The guarantee of optimal penetration and a significant shock effect.

What characterizes the GPA ball the most is undoubtedly its effectiveness. This ball can be presented as a programmed fragmentation ball. The compression of fluid in the central channel causes, at first, a deformation of the front part (mushrooming) which triples the nominal diameter of the projectile, then, only under the effect of resistance, occurs the separation of the petals.
