SKU	Item designation	French Law	Width (cm)	Height (cm)	Colors	MSRP
A50895	Picaillon shooting angulator	Vente libre	11.1	34.9	Orange	4.00 € incl. tax

The best security tool to enforce the 30 degree angle.

Allows you to clearly visualize beaten fire angles.

Price per unit, to be used in a batch of 3.

Position 3 Picaillon beacons by installing at the station: a beacon at the shooter's location, 1 beacon at the left end of the authorized range, 1 beacon at the right end of the firing angle (respecting the safety angle of 30 ° to the next shooter or area to avoid).

Sold by lot of 12 gunsmiths, to use by 3 minimum (post, left, right), selling price per unit.

- Easy handling
- Pointed for easy planting
- Openwork for suspension or transport with a carabiner
- Holds in the hunting bag of a hunting jacket
- Non-slip for crushing and removal.

The statistics on hunting accidents remind us that hunters still shoot too often in dangerous directions, especially on the line of posted, ignorance, emotivity, and especially lack of visualization of authorized and secure shooting angles.

To calculate your angle at 30 degrees, we advise you to go 5 steps (from your post) to the negative zone on the right and then 3 steps to the left, plant your pimple. Then come back to your post, and make 5 steps to the negative zone to the left then 3 to the right. You have just completed your 30 degree firing angle.
